

# LABOUR FORCE

AUSTRALIA  
PRELIMINARY

EMBARGOED UNTIL 11:30AM THURS 13 JULY 1995

## INQUIRIES

- For further information about these and related statistics, contact Sylvia Sajler on 06 252 6525 or any ABS office.

## JUNE KEY ESTIMATES

### TREND ESTIMATES

	May 95	Jun 95	monthly change
Employed persons (no. in '000s)	8 232.8	8 255.5	0.3 %
Unemployed persons (no. in '000s)	757.3	751.4	-0.8 %
Unemployment rate (%)	8.4	8.3	-0.1 pts
Participation rate (%)	63.7	63.8	0.0 pts

### SEASONALLY ADJUSTED

	May 95	Jun 95	monthly change
Employed persons (no. in '000s)	8 216.4	8 268.1	51.7
Unemployed persons (no. in '000s)	766.7	750.2	-16.4
Unemployment rate (%)	8.5	8.3	-0.2 pts
Participation rate (%)	63.7	63.8	0.2 pts

## JUNE KEY POINTS

### TREND ESTIMATES

#### EMPLOYMENT

- rose to 8,255,500 in June 1995, 4.5% higher than a year ago. Full-time and part-time employment rose by 3.7% and 6.8% respectively in that period.

#### UNEMPLOYMENT

- fell to 751,400, 20.7% lower than the peak of 917,200 recorded in September 1993.

#### UNEMPLOYMENT RATE

- fell to 8.3% in June 1995, compared with 9.8% recorded in June 1994.

#### PARTICIPATION RATE

- actually rose by less than 0.1 pts, but due to rounding stands at 63.8%. The male and female rates stood at 73.9% and 54.0% respectively.

### SEASONALLY ADJUSTED ESTIMATES

#### EMPLOYMENT

- rose by 51,700 to 8,268,100, with a rise of 30,200 in part-time employment. Total female employment rose by 45,200, of which 32,800 was in part-time work.

#### UNEMPLOYMENT

- fell by 16,400 to 750,200, with a fall of 9,000 in persons seeking part-time work.

#### UNEMPLOYMENT RATE

- fell by 0.2pts to 8.3%. The female rate fell by 0.3 pts to 7.7%.

- NSW 7.5% (7.9% last month); Vic. 8.7% (8.6%); Qld 8.9% (9.3%); SA 10.3% (9.7%); WA 7.3% (7.4%); Tas. 9.4% (10.4%).

#### PARTICIPATION RATE

- actually rose by 0.2 pts but due to rounding stands at 63.8%. For females, the rate rose by 0.4 pts to 54.2%, the highest rate recorded by the survey.

# LABOUR FORCE NOTES

## FORTHCOMING ISSUES

ISSUE	RELEASE DATE
July 1995	10 August 1995
August 1995	7 September 1995
September 1995	12 October 1995
October 1995	9 November 1995
November 1995	7 December 1995
December 1995	11 January 1996

## ROUNDING

Estimates of monthly change shown on page 1 have been calculated using unrounded estimates, and may be different from, but are more accurate than, movements obtained from the rounded estimates. The graphs on page 1 also depict movements calculated from unrounded estimates.

## SAMPLING ERRORS

The estimates in this publication are based on a sample survey. Because the entire population is not enumerated, the published estimates and the movements derived from them are subject to sampling variability. Standard errors give a measure of this variability and appear on pages 30 and 31.

The 95% confidence intervals below provide another way of looking at the variability inherent in estimates from sample surveys. The interval bounded by the two limits is the 95% confidence interval. A 95% confidence interval indicates that we are 95% confident that the upper and lower limits enclose the true value of the estimate.

SEASONALLY ADJUSTED DATA SERIES	MOVEMENTS MAY 1995 TO JUNE 1995	Monthly change	95% Confidence interval
Total employment	51 700	12 900	to 90 500
Total unemployment	-16 400	-32 200	to -600
Unemployment rate	-0.2 pts	-0.4 pts	to 0.0 pts
Participation rate	0.2 pts	0.0 pts	to 0.4 pts

Australian Statistician

## PRINCIPAL LABOUR FORCE SERIES: Trend estimates

.....

### EMPLOYED PERSONS

After reaching a peak of 7,894,700 in June 1990, trend employment fell by 3.5% to a low of 7,615,400 in January 1993. The trend has been rising since then, and in June 1995 stood at 8,255,500, 4.6% higher than the June 1990 peak.

### UNEMPLOYED PERSONS

From a low of 491,500 in October 1989, trend estimates of unemployment rose continuously over the next four years (apart from slight falls in the first half of 1993) to reach 947,200 in September 1993. The trend has been falling since September 1993, and in June 1995 stood at 751,400.

### UNEMPLOYMENT RATE

The trend unemployment rate reached a peak of 11.1% in December 1992 (rising from a low of 5.9% in late 1989), before falling slightly and remaining flat at 10.9% for most of 1993. The trend unemployment rate has been falling since then, and in June 1995 was 8.3%, the lowest level since December 1990.

**UNEMPLOYED PERSONS:** Trend estimates

### UNEMPLOYED MALES

**TOTAL**

Trend unemployment estimates for males fell to 264,800 in October 1989 before rising to a high of 585,100 in December 1992. Since then, the trend has been falling although the rate of decline has slowed in recent months. In June 1995, the trend stood at 448,700, 23.3% lower than the December 1992 peak.

MALES LOOKING FOR  
FULL TIME WORK

Trend estimates of the number of males looking for full-time work rose from 231,600 in October 1989, to a peak of 534,900 in December 1992. The trend has been falling since then, and in June 1995 stood at 397,800, the lowest level since early 1991.

MALES LOOKING FOR  
PART TIME WORK

After falling between June 1993 and April 1994, trend estimates of the number of males looking for part-time work rose to a peak of 52,700 in September 1994. For the rest of 1994 and early 1995, the trend began to fall, before rising in each of the last three months. In June 1995, the trend stood at 50,900.

# UNEMPLOYED PERSONS: Trend estimates

## UNEMPLOYED FEMALES

### TOTAL

Trend estimates of female unemployment rose from 226,800 in late 1989 to 362,500 in July 1992. After falling slightly, the trend continued to rise, peaking at 379,200 in October 1993. The trend has been falling since then, and in June 1995 stood at 302,700, the lowest level since early 1991.

### FEMALES LOOKING FOR FULL TIME WORK

Trend estimates of unemployed females looking for full-time work rose from 149,500 in October 1989 to a peak of 274,400 four years later. The trend has been falling since October 1993, and in June 1995 was 208,700, the lowest level since early 1991.

### FEMALES LOOKING FOR PART TIME WORK

Trend estimates of the number of females looking for part-time work began to increase rapidly in 1990, rising from 77,000 in January 1990, to a peak of 107,400 in July 1994. The trend has been generally falling since then and in June 1995 was 94,100.

## EXPLANATORY NOTES

---

### INTRODUCTION

**1** This publication contains preliminary estimates of the civilian labour force derived from the labour force survey component of the monthly population survey. Estimates for the current month are preliminary and subject to revision. Revised estimates for the current month and more detailed estimates will be published in *The Labour Force, Australia* (6203.0).

### MONTHLY POPULATION SURVEY

**2** The population survey is based on a multi-stage area sample of private dwellings (currently about 30,000 houses, flats, etc.) and a list sample of non-private dwellings (hotels, motels, etc.), and covers about 0.5% of the population of Australia. The information is obtained from the occupants of selected dwellings by specially trained interviewers. The interviews are generally conducted during the two weeks beginning on the Monday between the 6th and 12th of each month. The information obtained relates to the week before the interview (i.e. the reference week).

### SCOPE OF SURVEY

**3** The Labour Force Survey includes all persons aged 15 and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments customarily excluded from census and estimated populations, overseas residents in Australia, and members of non-Australian defence forces (and their dependants) stationed in Australia.

### COVERAGE

**4** In the Labour Force Survey, coverage rules are applied which aim to ensure that each person is associated with only one dwelling, and hence has only one chance of selection. The coverage rules are necessarily a balance between theoretical and operational considerations. Nevertheless, the chance of a person being enumerated at two separate dwellings in the survey is considered to be negligible.

### POPULATION BENCHMARKS

**5** Labour Force Survey estimates are calculated in such a way as to add up to independent estimates of the civilian population aged 15 and over (population benchmarks). From February 1994, labour force estimates have been compiled using benchmarks based on the results of the 1991 Census of Population and Housing. Small revisions were made to many of the historical estimates from January 1989 to January 1994.

### REVISION OF SERIES

**6** From April 1986, the definition of employed persons was changed to include persons who worked without pay between 1 and 14 hours per week in a family business or on a farm (i.e. unpaid family helpers). For further information, see paragraphs 36 and 37 of the Explanatory Notes to the February 1987 issue of *The Labour Force, Australia* (6203.0).

### SURVEY SAMPLE REDESIGN

**7** The Labour Force Survey sample was redesigned and reselected using information collected in the 1991 Census of Population and Housing. The new sample was phased in over the period September to December 1992. For details, see *Information Paper: Labour Force Survey Sample Design* (6269.0).

**8** For the most part, one quarter of the new sample was introduced each month so that, by December 1992, the entire new sample was in place. Replacement generally occurred at the rotation group level with two groups being substituted each month. Such a pattern of implementation meant that any changes to labour force estimates due to differences between the two samples, or any other influences, were spread over the four months rather than being concentrated in one inter-month period.

**9** This phase-in scheme applied to the private dwelling sample in urban areas. The new sample for non-private dwellings and private dwellings in rural areas was introduced in a single stage in November 1992.

---

**RELIABILITY OF ESTIMATES**

**10** Two types of error are possible in an estimate based on a sample survey: sampling error and non-sampling error.

*Sampling error* occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all dwellings in the survey is given by the standard error. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all dwellings had been included in the survey, and about nineteen chances in twenty that the difference will be less than two standard errors. Standard errors of estimates for the latest month and of estimates of movements since the previous month are shown on pages 30 and 31. Standard errors of other estimates and other movements may be determined by using information in the Technical Notes in *The Labour Force, Australia* (6203.0).

*Non sampling error* arises from inaccuracies in collecting, recording and processing the data. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures.

**SEASONAL ADJUSTMENT AND TREND ESTIMATION**

**11** Seasonally adjusted series are published in Tables 2, 5 and 12 to 17. Seasonal factors are reviewed annually to take account of each additional year's original data. The results of the latest review were used to compile the revised seasonally adjusted and trend estimates given in this publication. Information about the method of adjustment and revised seasonally adjusted and trend estimates for all months from January 1990 were published in an appendix to the February 1995 issue of *The Labour Force, Australia* (6203.0).

**12** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour. For example, irregular factors unrelated to the trend account for more than half the seasonally adjusted movement with the following frequency:

- Employment: 5 in 10 monthly movements
- Unemployment: 7 in 10 monthly movements
- Unemployment rate: 7 in 10 monthly movements
- Participation rate: 9 in 10 monthly movements

**13** The smoothing of seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series, and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time. These are published in Tables 3, 6 and 12 to 19.

**14** While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller, and after three months have a negligible impact on the series. There will also be revisions as a result of the annual review of seasonal factors.

SEASONAL ADJUSTMENT AND  
TREND ESTIMATION (continued)

**15** Trend estimates are published for the Northern Territory in Table 18 and for the Australian Capital Territory in Table 19. Unadjusted series for the two Territories have shown, historically, a high degree of variability, which can lead to considerable revisions to the seasonally adjusted estimates after each annual seasonal factor re-analysis. Seasonally adjusted estimates are not currently published for the two Territories. The most recent six months trend estimates are subject to revision. For the three most recent months, the revision may be relatively large. Inferences about trends drawn from smoothed seasonally adjusted (trend) estimates for months earlier than the latest three months are unlikely to be affected by month to month revisions. They may be affected by revision resulting from the annual re-analysis of seasonal factors.

**16** For further information, see *A Guide to Interpreting Time Series — Monitoring 'Trends': an Overview* (1348.0) or contact the Assistant Director, Time Series Analysis on (06) 252 6345.

RELATED PUBLICATIONS

**17** Users may also wish to refer to *The Labour Force, Australia* (6203.0). This publication contains a detailed list of related publications which are available from ABS Bookshops.

**18** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

UNPUBLISHED STATISTICS

**19** As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Sylvia Sajler on 06 252 6525 or to any ABS office.

EFFECTS OF ROUNDING

**20** Estimates have been rounded and discrepancies may occur between sums of the component items and totals.

**21** Estimates of movement shown in this publication are obtained by taking the difference of unrounded estimates. The movement estimate is then rounded to one decimal place. Therefore where a discrepancy occurs between the reported movement and the difference of the rounded estimates, the reported movement will be more accurate.

SYMBOLS AND OTHER USAGES

- \* subject to sampling variability too high for most practical uses. See the Technical Notes in 6203.0 for more details.

- r revised
- pts percentage points

## GLOSSARY

<b>Actively looking for work</b>	Includes writing, telephoning or applying in person to an employer for work; answering a newspaper advertisement for a job; checking factory or Commonwealth Employment Service noticeboards; being registered with the Commonwealth Employment Service; checking or registering with any other employment agency; advertising or tendering for work; and contacting friends or relatives.
<b>Attending school</b>	Persons aged 15 to 19 enrolled full time at secondary or high schools in the reference week.
<b>Attending tertiary educational institution full time</b>	Persons aged 15 to 24 enrolled full time at a TAFE college, university, or other educational institution in the reference week.
<b>Employed</b>	Persons aged 15 and over who, during the reference week: <ul style="list-style-type: none"> <li>■ worked for one hour or more for pay, profit, commission or payment in kind in a job or business, or on a farm (comprising employees, employers and self-employed persons); or</li> <li>■ worked for one hour or more without pay in a family business or on a farm (i.e. unpaid family helpers); or</li> <li>■ were employees who had a job but were not at work and were: <ul style="list-style-type: none"> <li>■ on paid leave, on leave without pay for less than four weeks up to the end of the reference week,</li> <li>■ stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks up to the end of the reference week,</li> <li>■ on strike or locked out,</li> <li>■ on workers' compensation and expected to be returning to their job, or</li> <li>■ receiving wages or salary while undertaking full-time study; or</li> </ul> </li> <li>■ were employers, self-employed persons or unpaid family helpers who had a job, business or farm, but were not at work.</li> </ul>
<b>Full-time workers</b>	Employed persons who usually worked 35 hours or more a week (in all jobs) and those who, although usually working less than 35 hours a week, worked 35 hours or more during the reference week
<b>Labour force</b>	For any group, persons who were employed or unemployed, as defined.
<b>Labour force status</b>	A classification of the civilian population aged 15 and over into employed, unemployed or not in the labour force, as defined. The definitions conform closely to the international standard definitions adopted by the International Conferences of Labour Statisticians.
<b>Not in the labour force</b>	Persons who were not in the categories employed or unemployed as defined.
<b>Participation rate</b>	For any group, the labour force expressed as a percentage of the civilian population aged 15 and over in the same group.
<b>Part-time workers</b>	Employed persons who usually worked less than 35 hours a week and who did so during the reference week.
<b>Seasonally adjusted series</b>	A time series of estimates with the estimated effects of normal seasonal variation removed. See Explanatory Note 11 to 12 for more detail.
<b>Trend series</b>	A smoothed seasonally adjusted series of estimates. See Explanatory Notes 13 to 15 for more detail.

\*\*\*\*\*

<b>Unemployed</b>	Persons aged 15 and over who were not employed during the reference week, and:
	<ul style="list-style-type: none"><li>■ had actively looked for full-time or part-time work at any time in the four weeks up to the end of the reference week and:<ul style="list-style-type: none"><li>■ were available for work in the reference week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the reference week), or</li><li>■ were waiting to start a new job within four weeks from the end of the reference week and would have started in the reference week if the job had been available then; or</li></ul></li><li>■ were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the reference week (including the whole of the reference week) for reasons other than bad weather or plant breakdown.</li></ul>
<b>Unemployed looking for first full-time job</b>	Unemployed persons looking for full-time work (as defined above) who had never worked full time for two weeks or more
<b>Unemployed looking for full-time work</b>	Unemployed persons who actively looked for full-time work, or were to resume a full-time job from which they had been stood down.
<b>Unemployed looking for part-time work</b>	Unemployed persons who had actively looked for part-time work only, or were to resume a part-time job from which they had been stood down.
<b>Unemployment rate</b>	For any group, the number of unemployed persons expressed as a percentage of the labour force in the same group.

## STANDARD ERRORS

The estimates in this publication are based on information gained from the occupants of a sample survey of dwellings. Because the entire population is not surveyed, the published estimates are subject to sampling error. The most common way of quantifying such sampling error is to calculate the standard error for the published estimate or statistic.

### LEVEL ESTIMATES

To illustrate, let us say the published level estimate for employed persons aged 15 to 19 is 500,000. The calculated standard error in this case is 9,000. The standard error is then used to interpret the level estimate of 500,000. For instance, the standard error of 9,000 indicates that:

- There are approximately two chances in three that the real value falls within the range 491,000 to 509,000 ( $500,000 + \text{or} - 9,000$ )
- There are approximately nineteen chances in twenty that the real value falls within the range 482,000 to 518,000 ( $500,000 + \text{or} - 18,000$ )

The real value in this case is the result we would obtain if we could enumerate the total population.

The following tables show the standard errors for this month's level estimates.

	EMPLOYED.....			UNEMPLOYED.....					Not in labour force	Unemp- loyment rate	Partic- ipation rate

## STANDARD ERRORS continued

### MOVEMENT ESTIMATES

The following example illustrates how to use the standard error to interpret a movement estimate. Let us say that one month the published level estimate for females employed part time in Australia is 1,387,000; the next month the published level estimate is 1,400,000. The calculated standard error for the movement estimate is 9,800. The standard error is then used to interpret the published movement estimate of 13,000. For instance, the standard error of 9,800 indicates that:

- \* There are approximately two chances in three that the real movement over the two month period falls within the range 3,200 to 22,800 (13,000 + or - 9,800)
- \* There are approximately nineteen chances in twenty that the real movement falls within the range -6,400 to 32,600 (13,000 + or - 19,600).

The following tables show the standard errors for this month's movement estimates.

	EMPLOYED.....			UNEMPLOYED.....			Labour force	Not in labour force	Unemployment rate	Participation rate
	Employed full time	Employed part time	Total employed	Unemp. looking for fit work	Unemp. looking for p/t work	Total unemployed

# WHAT IF...? REVISIONS TO TREND ESTIMATES

\*\*\*\*\*

## EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

Each time new seasonally adjusted estimates become available, trend estimates are revised (see paragraphs 13 and 14 of Explanatory Notes).

### TREND REVISIONS

The examples in the tables below show four illustrative scenarios and the consequent revisions to previous trend estimates of employment and unemployment rate.

- 1 The July seasonally adjusted estimate is the same as the June estimate.
- 2 The July seasonally adjusted estimate is higher than the June estimate by:
  - \* +0.34% for employment
  - \* +2.3% for the unemployment rate
- 3 The July seasonally adjusted estimate is lower than the June estimate by:
  - \*\* -0.34% for employment
  - \*\* -2.3% for the unemployment rate
- 4 The July seasonally adjusted estimate results in a revised June trend estimate which is identical to the new July trend estimate.

The percentage changes of 0.34% and 2.3% were chosen because they represent the average absolute monthly percentage changes in employment and the unemployment rate respectively.

### EMPLOYMENT ('000)

WHAT IF NEXT MONTH'S SEASONALLY ADJUSTED ESTIMATE IS:				
	1	2	3	4
TREND as PUBLISHED	8 268.1 i.e. the same as Jun 1995	8 296.2 i.e. rises by 0.34%	8 240.0 i.e. falls by 0.34%	8 139.2 i.e. same trend for Jun & Jul
April	8 204.2	8 203.7	8 205.0	8 202.4
May	8 232.8	8 231.8	8 236.0	8 227.7
June	8 255.5	8 255.5	8 263.3	8 247.7
July (new)	—	8 273.8	8 285.6	8 262.0
				8 219.5

### UNEMPLOYMENT RATE (%)

WHAT IF NEXT MONTH'S SEASONALLY ADJUSTED ESTIMATE IS:				
	1	2	3	4
TREND as PUBLISHED	8.3 i.e. the same as Jun 1995	8.5 i.e. rises by 2.3%	8.1 i.e. falls by 2.3%	8.8 i.e. same trend for Jun & Jul
April	8.5	8.5	8.6	8.5
May	8.4	8.4	8.5	8.4
June	8.3	8.3	8.4	8.3
July (new)	—	8.3	8.4	8.2
				8.5

## FOR MORE INFORMATION

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

### INFORMATION CONSULTANCY SERVICES

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our offices (see below).

### ELECTRONIC DATA SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below).

### BOOKSHOP AND SUBSCRIPTIONS

There is a large number of ABS publications available from the ABS Bookshops in each of our offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free Australia wide on 008 0206 08.
